

# Our Services

## Automatic doors

Opening a door is something that a lot of people take for granted. With our services we can make opening a door as easy as asking google to open it for you or pressing a button that automatically opens it.

## Complete window automation

This includes opening the actual window and moving the blinds up and down.

We can install apps, buttons and more to be able to open and close both of these parts.

## + LOTS MORE

Our assistive technology has no limits, we are willing and able to help as many people as possible, finding new solutions everyday to combat the difficulties people may face in day to day life.

## Tablet/Phone controllable devices

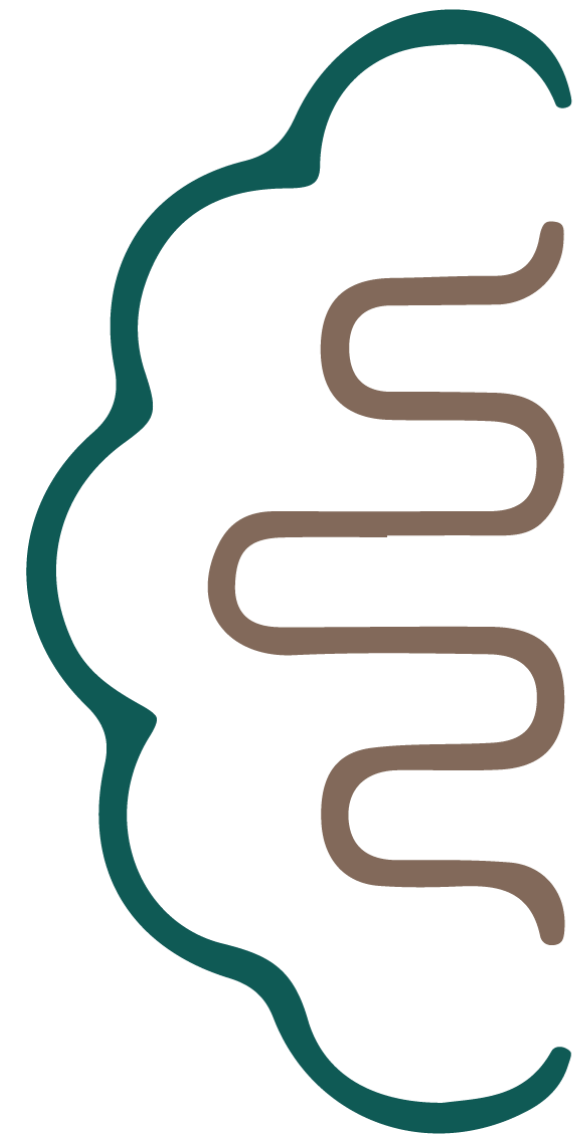

Our technology solutions help create a simple, effective way to have all your home devices ready to be either open/closed and turned on/off all at the click of a button. With a simple, easy to use app that has all devices programmed into it ready for you to use.

## TV + AC control

Using an app or a voice controlled device, you will be able to control the TV, change the temperature of the AC and much more!

## Voice activated technology

We provide an easier option to everyday tasks by using your voice. Being able to turn on lights, open doors and move blinds up and down just by asking google makes everyday life so much easier for everyone. Giving people the autonomy they deserve.

# Technabilities

Transform your ability, transform your life, transform your story,  
Assistive technology to change your life
